

ICS ALL NEW M4 TRANSFORM4

ICS®
The Best Thing We Create
創造完美 永無止境

STUBBORNNESS ACHIEVES A DREAM

EBB system is one of the most popular models of AEG, the poor durability of the market standard EBB system resulting in the miserable condition of use inferior product. Perfect quality is the top priority than follow the trend and popularity. ICS's philosophy is do the best, no compromise. The founder of ICS, Mr. Chu believes if a gun can't satisfy all users' needs, it is not perfect enough to be on the market. ICS decided to create a product that consumer truly desire for, including simulation, innovation, and user-friendly design all in one. ICS's goal is to provide what a real gun cannot give, to reach what a real gun cannot achieve.

SELF REQUIREMENTS, NO COMPROMISE

Mr. Chu led ICS's R&D team to start a comprehensive inspection for the shortcomings of traditional EBB system, breaking up the old thinking into parts and overturn the conservative design. After two years of research and experiment, ICS came out a

brand new EBB split gearbox with the highest quality requirement but simplest structure design. The blow back function is still as good as new after hundred thousand times of durable test, it is a perfect transform.

BRAND-NEW DESIGN SIMPLE AND PURE PERFECTION

ICS believes you can have the cake and eat it too; the goal is to meet all the needs and wants of players. The brand new EBB system is not only with the invincible durability and easy assembly, but also with the considerate designs and high compatibility. ICS aim to create a perfect transformation of AEG, the insistence of every detail created a dream gun in the end, including simulated shooting sensation and user-friendly designs at the same time. TransforM4 CXP-UKI will transform into a new force coming to the airsoft

LATEST ELEMENTS PLUS REINFORCED KIT

The fashionable appearance design is one of the important parts of transform. UK1 hand-guard equips the latest KeyMod system, with the same specifications of the real gun. The TMAG magazine of CXP-UK1 provides high, medium, and low capacity choices. The designs

of anti slippery lines and bb capacity window are very considerate. Six positions adjustable MTR stock provides high adjustability, comfort and stability. The comprehensive upgrade and new designs of TransforM4 is the great achievement of ICS spirit.

TransforM4 CXP-UK1 with the standard equipment of reinforced piston, metal hop-up set, and MIM process No.1 and motor gear, gives you the most robust system.

The integrated receiver, build-in lower receiver pin, and bilateral charging handle have increased in intensity and simulation. We integrated the safety

selector lever with the spring release function; without extra step, the routine action would protect your love gun easily.

TransforM4 enhanced the functionality and expandability as well. Strong, durable, and simulative is the original intention of ICS's design. The comprehensive transform achieves a dream gun; we will hold the same spirit of innovation, the best thing we create.
