**Update: 27th, Aug. 2019**

**Note:**

- 1) The upper receiver rail has to be changed to CXP-15 upper receiver rail to install the CXP-15 handguard.
- 2) The upper receiver rail has to be changed to CXP-16 upper receiver rail to install the CXP-16 handguard.
- 3) The CXP-16 upper receiver rail has to be changed to M4 std. upper receiver rail to install the handguard.
- 4) The CXP-15 upper receiver rail is advised to be changed to M4 std. upper receiver rail to install the handguard, but not a must.
- 5) The CXP-MARS, CXP-YAK and PAR Mk3 have higher upper receiver, so the handguard rail would not be even as the upper receiver rail. Not suggested.
- 6) Except for the handguard, the related outer barrel may also be replaced if changing the handguard.
